

Illegal Hauling Means Illegal Dumping

If a clean-up crew or dumpster service offers incredibly cheap rates, this might be why:

Help us put a stop to illegal dumping by hiring only **Registered Commercial Haulers**. These companies are bound to monitoring and reporting requirements, mandatory participation in recycling programs, and other conditions to protect public health and safety. They are also obligated to help us meet our State- mandated waste diversion goals.

Only **Registered Commercial Haulers** can legally charge a fee for collecting commercial solid waste, including C&D debris, in the City of Elk Grove.

Hiring an illegal hauler will put your building permit in jeopardy.

What Are the Basics?

The City of Elk Grove has worked closely with the building community to ensure that the C&D Debris Recycling Program is simple and streamlined. It's as easy as 1-2-3:

- 1. Make a Waste Management Plan**
Decide how you are going to manage debris on your jobsite and how you will satisfy your recycling requirements.
- 2. Execute Your Waste Management Plan**
Recycle the targeted materials and hire only Registered Commercial Haulers.
- 3. Report Your Results**
You will receive a blank Waste Log with your building permit. Maintain it and return the completed form at the end of your project.

Educate Your Employees

You must inform all of your employees and subcontractors about your Waste Management Plan because you are responsible for all of the debris from your project.

What is the Construction and Demolition (C&D) Debris Recycling Program?

As of July 1, 2010, contractors, subcontractors and employees are responsible for the proper recycling of construction and demolition (C&D) debris.

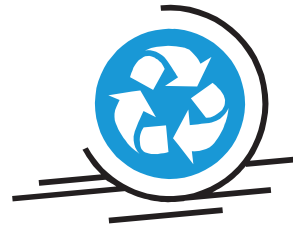

The City of Elk Grove's Construction and Demolition (C&D) Debris Recycling Program requires that the following five (5) materials be recycled:

1. **Scrap metal**
2. **Inert materials** (concrete, asphalt paving, bricks, etc.)
3. **Corrugated cardboard**
4. **Wooden pallets**
5. **Clean wood waste** (unpainted, untreated lumber & plywood—fasteners OK)

What Does It Cost?

For projects over \$250,000 in value, the fee is 0.04% of the project value (with a maximum fee of \$800 for a \$2 million project or more). The minimum fee for a demolition project is \$40.

Unlike many other programs around the State, a performance deposit is not required. However, if you are out of compliance, you may be required to place a deposit on your next project. Other probationary measures may also be applied to your subsequent projects *if you hire illegal haulers or fail to recycle.*

How Do I Comply?

Complete a Waste Management Plan (WMP)

Identify the waste you will be generating on your project. The plan should include recycling and hauling methods.

Outline a Recycling Method

- Source Separation: Separate the individual materials into distinct containers or corrals; OR
- Mixed Recovery: Combine materials into one dumpster for sorting at a Certified C&D Sorting Facility.

Outline a Hauling Method

- Self-Haul, OR
- Hire a Registered Commercial Hauler

Maintain and Return a Waste Log (WL)

You must keep a log of all waste hauling activity in the permit folder on your construction site. You will be given a blank Waste Log with your permit.

Return your completed Waste Log within 30 days of your Certificate of Occupancy or when your project is finalized. You do not need to factor recycling percentages by material.

Failure to return your completed Waste Log in a timely manner may result in additional steps when you apply for your next building permit.

Who Can I Hire to Haul Waste?

Only Registered Commercial Haulers can collect and haul commercial solid waste (including C&D debris) in the City of Elk Grove.

Registered Commercial Haulers

Name of Hauler	Phone
1-800-GOT-JUNK?	(916) 437-8168
Aces Waste Services	(916) 684-4220
Advance Disposal	(916) 920-2747
All Waste Systems	(916) 456-1555
Allied Waste	(916) 631-0600
Atlas Disposal	(916) 455-2800
CA Waste Recovery Systems	(916) 441-1985
Elk Grove Waste Management	(916) 689-4052
Mini Drops	(916) 776-1499
