

 **Why Green Building?**

- Calls for 20% average energy efficiency improvement in buildings
- Updated green building ordinance for new and remodeling
- PACE financing to incentivize energy efficiency retrofits

**City of San Rafael
Climate Change Action Plan**

The diagram is a circular graphic with a globe in the center. It is divided into four quadrants by a vertical and a horizontal line. The quadrants are labeled: 'Our Economy' (top-left), 'Our Environment' (top-right), 'Our Buildings' (bottom-left), and 'Our Lifestyles' (bottom-right). Each quadrant contains a small green icon representing that category: a dollar sign for economy, a leaf for environment, a house for buildings, and a person for lifestyles.
