Webinar Host & Moderator

Melissa Kuehne
Program Manager
Institute for Local Government
What does the public think about local government, new taxes, and rate increases? As budgets tighten because of COVID-19, local governments statewide are grappling with difficult decisions around which services to offer in light of decreased revenues. The right data can help take the guesswork out of revenue options, service delivery and prioritization.

Today’s webinar will share the results of statewide survey highlighting key priorities for essential services, revenue measures and engagement opportunities. The City of Rancho Cucamonga will share their practical experience and lessons learned from using survey and other data to help make difficult decisions.
How to Ask a Question During the Webinar

• All webinar participants will be on MUTE during the entire call.

• Please TYPE any questions into the question box at any time during the webinar.

• The moderator will read your questions during the question period at the end of the webinar.
ILG is the non-profit training and education affiliate of…

We provide practical and easy-to-use resources so local agencies can effectively implement policies on the ground.
Our mission is to help local government leaders navigate complexity, increase capacity & build trust in their communities.

Probolsky Research — Statewide Voter Survey
Survey Methodology*

From Saturday, May 2, 2020 to Tuesday, May 5, 2020, Probolsky Research conducted a live-interviewer telephone and online survey among likely voters in California.

A total of 900 voters were surveyed (300 by telephone and 600 online). A survey of this size yields a margin of error of +/-3.3%, with a confidence level of 95%. Interviews were conducted with respondents on both landline (50%) and mobile phones (50%) and were offered in English (90%) and Spanish (10%) languages. For the online survey phase, we invited participation via email and text. Security measures precluded individuals from completing the survey more than once and allowed only the designated voter to complete the survey. Online respondents were able to use their computer, tablet or smart phone to participate.

Split sample: For two questions, we employed a split sample approach, meaning we tested one version of a question among split sample A, 50% of respondents, and a slightly different question with split sample B, 50% of the sample. The sample is divided randomly into halves in order to ensure reliability and validity of the split sample. We use split samples to test the differences between two or more variations in wording of a given question. Split samples provide the opportunity to evaluate the efficacy of certain messages as well as how differently audiences react to the given variations in messages.

The original sample was compiled by the 58 California county election officials and then enhanced with consumer data to ensure we reached voters on their most current phone numbers and email addresses. Probolsky Research applies a stratified random sampling methodology to ensure that the demographic proportions of survey respondents match the demographic composition of likely voters.

Probolsky Research specializes in opinion research on behalf of corporate, election, non-profit, and special interest clients.

*Due to rounding, totals shown on charts may not add up to 100%
Trusting in Government
52% say they trust state government to provide accurate, complete and useful information about the COVID-19 pandemic and economic recovery.

Question: What level of government do you trust to provide you with accurate, complete and useful information about the COVID-19 pandemic and economic recovery? Select all that apply.

- State: 51.8%
- County: 38.8%
- City: 33.2%
- Federal: 18.3%
- Special Districts: 6.6%
- I don’t trust any of them: 24.7%
- Unsure/Prefer not to answer: 5.0%
Engagement With Local Government
43% say local government should share more

Information on a regular basis

Question: Thinking about the communication you see from your city, county and special district governments, would you like them to share more, share less or the same amount of information with you on a regular basis?
Sales Taxes
Question: If the November General Election were today, how would you vote on a city or county half-cent sales tax increase to fund essential services like police, firefighters, paramedics, and 911 operators?

[SPLIT SAMPLE A]

52% say they would vote “yes” on a half-cent sales tax increase to fund essential services like police, firefighters, paramedics, and 911 operators.
49% say they would vote “no” on a half-cent sales tax increase to fund freeways and road improvements, traffic reduction measures and public transportation.

Question: If the November General Election were today, how would you vote on a city or county half-cent sales tax increase to fund freeway and road improvements, traffic reduction measures and public transportation?

[SPLIT SAMPLE B]
56% say they would vote “yes” on a one-percent hotel tax increase to fund essential services like police, firefighters, paramedics and 911 operators

Question: If the November General Election were today, how would you vote on a city or county one-percent hotel tax increase, only paid by hotel and motel visitors, to fund essential services like police, firefighters, paramedics, and 911 operators?

[SPLIT SAMPLE A]
54% say they would vote “yes” on a one-percent hotel tax increase to fund essential services like police, firefighters, paramedics and 911 operators.

Question: If the November General Election were today, how would you vote on a one-percent city or county hotel tax increase, only paid by hotel and motel visitors, to fund essential services like police, firefighters, paramedics, 911 operators, homeless services, libraries, park improvements, and senior and teen services?

[Split Sample B]
Water Agencies
47% say they prioritize their water and sewer bill over entertainment, 26% over retirement or savings

Question: Considering all your household expenses, if you had limited funds, how would you prioritize paying your water and sewer bills? Select all that apply.

- Prioritize water and sewer bill over entertainment: 47.4%
- Prioritize water and sewer bill over contributing to retirement or savings: 26.2%
- Prioritize water and sewer bill over car payments and expenses: 17.2%
- Prioritize water and sewer bill over insurance: 15.0%
- Prioritize water and sewer bill over other utilities like electricity and gas: 10.6%
- Prioritize water and sewer bill over groceries: 9.2%
- Prioritize water and sewer bill over mortgage or rent: 5.0%
- I would not prioritize paying my water and sewer bill over any household expenses: 17.6%
- I don't have a water or sewer bill at my home: 10.7%
- Unsure/Prefer not to answer: 12.4%
56% say water agencies should stop rate increases and go into debt or use reserves to cover rising costs during the COVID-19 pandemic.

Question: Water agencies regularly raise rates to cover energy, infrastructure and water costs. Without raising rates, water agencies have to go into debt or use reserves that might be needed in case of an emergency like an earthquake. During this COVID-19 pandemic and economic recovery, should water agencies continue to raise rates to cover their costs or should they stop rate increases?

Stop rate increases

Overall: 23.7% raise rates, 56.4% stop rate increases and go into debt or use reserves, 20% unsure/prefer not to answer.

Los Angeles County: 23.0% raise rates, 62.8% stop rate increases, 14.2% unsure/prefer not to answer.

Southern CA: 24.8% raise rates, 56.7% stop rate increases, 18.5% unsure/prefer not to answer.

Central Valley: 28.6% raise rates, 52.0% stop rate increases, 20.7% unsure/prefer not to answer.

San Fran Bay Area: 28.3% raise rates, 45.7% stop rate increases, 26.0% unsure/prefer not to answer.

Other Northern CA: 19.9% raise rates, 17.6% stop rate increases, 62.5% unsure/prefer not to answer.

Los Angeles County: 19.4% raise rates, 19.6% stop rate increases, 61.0% unsure/prefer not to answer.

Central Valley: 18.5% raise rates, 18.5% stop rate increases, 63.0% unsure/prefer not to answer.

San Fran Bay Area: 17.6% raise rates, 17.6% stop rate increases, 64.8% unsure/prefer not to answer.

Other Northern CA: 17.6% raise rates, 17.6% stop rate increases, 64.8% unsure/prefer not to answer.
44% say they agree with the statement: “My local water district cares about the health and well-being of me and my family.”

Question: Agree or disagree: “My local water district cares about the health and well-being of me and my family.”

Agree
Using Data to Inform Public Policy Decisions

Lori Sassoon
City of Rancho Cucamonga

SOURCE DOCUMENTS

FACTS (AKA DATA)
Layers of operational data

- Workload information
- Efficiency measures
- Financials
Layers of opinion data

- Social media comments
- Proactive public engagement - online platforms, public forums, stakeholder engagement
- Resident surveys
- Resident or voter polling

*Polls give us the facts about community opinions*
Informal Surveys vs Scientific Survey (aka Polls) – and when

- Surveys are not as reliable as polls, but less expensive
- Polls are more predictive, but more expensive
- Both can be useful
- When we are looking at revenue measures, should be using all data sources – but landing on a poll
Why a poll?

Making sure the sample is representative of the likely voter turnout demographics (party, age, etc.)

Asking the question exactly how it would be asked on the ballot

Testing informational statements

Can be trusted the survey result as a likely predictor of pass/fail of a measure
56% are more likely to vote yes knowing that raising the TOT by 2% would generate approximately $1,000,000 in new revenue for the City.

Question 19: Raising the transient occupancy tax by 2% would generate approximately $1,000,000 in new revenues for the City. Does knowing this make you more likely to vote yes or more likely to vote no on the transient occupancy tax ballot measure?

**Among those who initially voted no**
- More likely to vote yes: 12.3%
- More likely to vote no: 46.2%
- Makes no difference: 31.1%
- Unsure/Prefer not to answer: 10.4%

**Among those who initially voted unsure**
- More likely to vote yes: 40.5%
- More likely to vote no: 14.9%
- Makes no difference: 2.7%
- Unsure/Prefer not to answer: 41.9%
Beware the echo chamber...

i've heard the rhetoric from both sides... time to do my own research on the real truth
