Chapter 9: Priorities and Projects

Each City and the County can adopt the Tulare County Regional Bicycle Transportation Plan to meet State and Federal requirements for grant funding sources to develop the projects contained within. However, each jurisdiction has the option to develop and approve its own bicycle plan, or to utilize some portion of the Plan to do so. The Cities of Visalia and Lindsay each created a local bicycle plan to enhance the planning and implementation of bicycle facilities in their cities. To the extent feasible, this Plan has incorporated existing local plans (including those for the Cities of Visalia and Lindsay) and prioritizes as part of the recommendations to eliminate confusion. This section details the priority projects as submitted by local agencies and recommended by the Bicycle Advisory Committee. As provided, the projects within each jurisdiction are listed as a Short Term (1-4 Years), Medium Term (4-10 years), and Long Term (10+ years) projects. Each of the sections includes the discussion of items a-k. in California Codes Streets and Highways Code 891.2.

County of Tulare

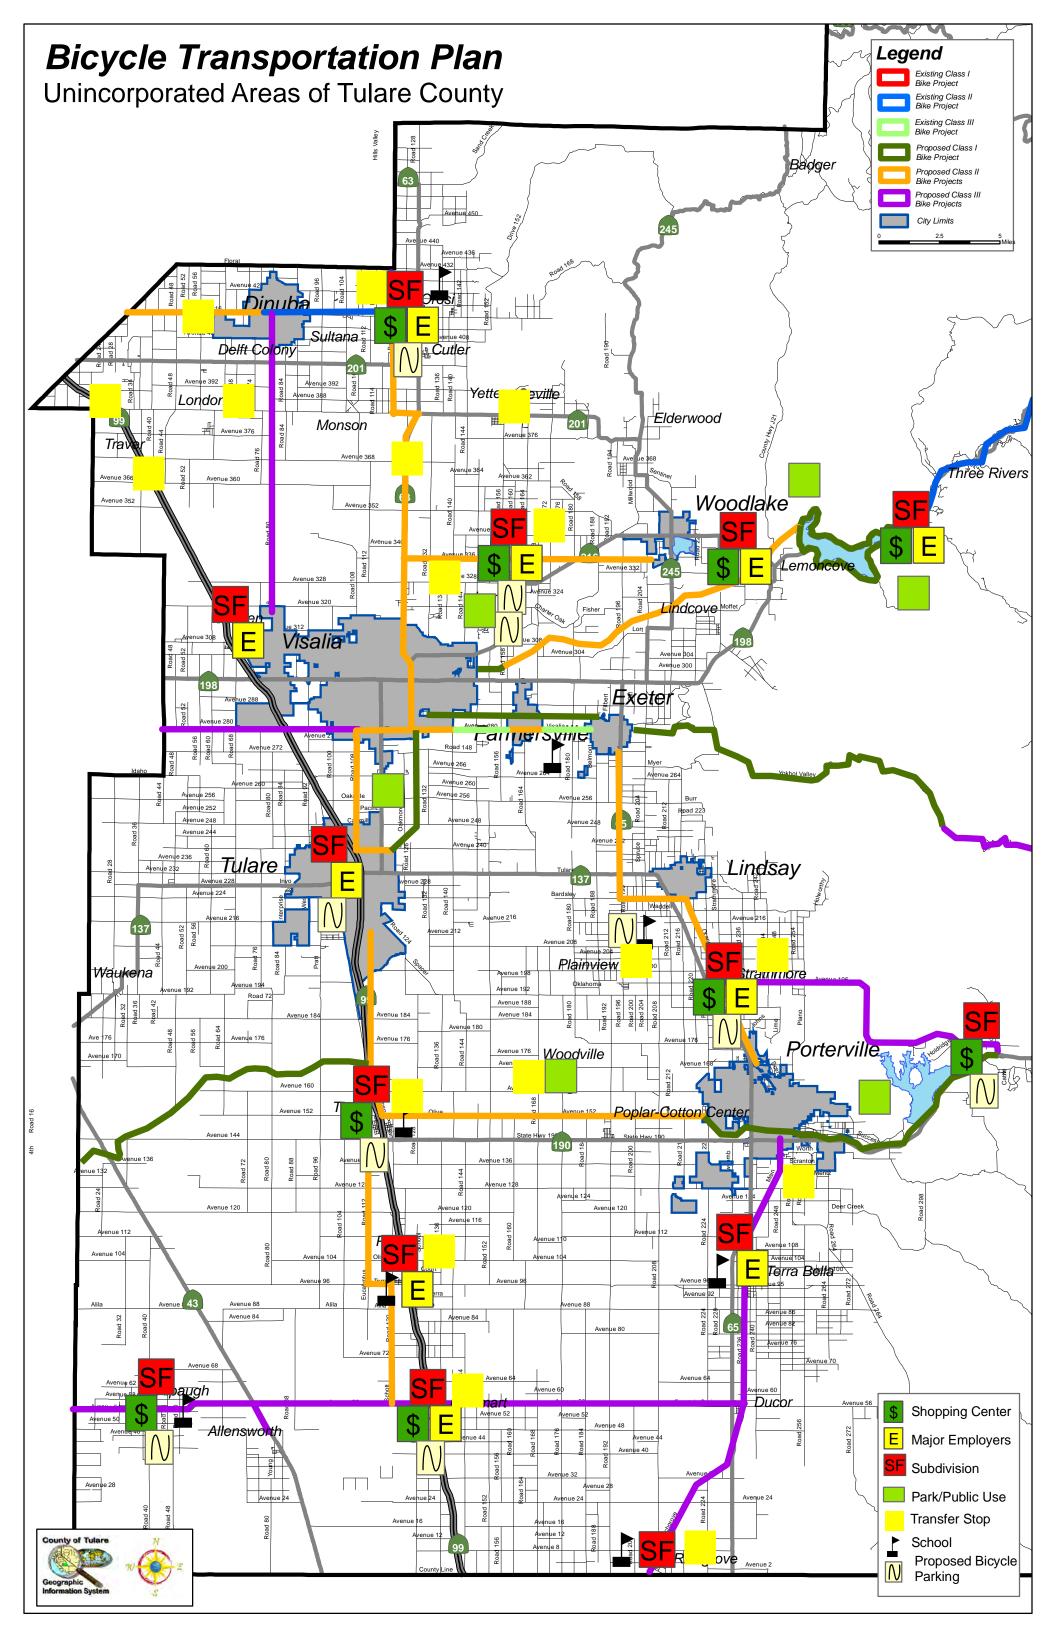

Tulare County is one of the largest counties in the State. Approximately 146,356 persons live in unincorporated Tulare County, which covers nearly 4,791 square miles. The western portion of the County is part of the fertile Central Valley, and home to diverse agriculture. In the eastern portion of the County, the Sierra Nevada range rises more than 14,000 feet above the valley floor, and is home to several National Parks and Forests. The majority of Tulare's roadway system is located in the western portion of the County on level terrain, and was developed on a north-south axis square mile grid. This grid system on level terrain provides a network of roadways for cyclists with multiple connections and alternatives between destinations for bicycle commuters. The roadway network in the eastern county provides a range of moderate to challenging routes for the recreational cyclist.

County of Tulare
2010 Population: 146,356

110 Population:	146,356

j.	Description of the projects proposed in the Plan and their priorities	Please see Tulare County bicycle p	orojects map and tables				
k.	A description of past expenditures for bicycle projects improving safety and convenience for commuters	Please see Chapters 5, 7 and 9 and and tables.	d Tulare County bicycle projects map				

^{*}Bicycle rates ranging from 0.4% for commuter trips only (Journey to Work 2000 Census Brief) to 1.6% for all trips made by bicycle in Tulare County (2000-2001 California Statewide Travel Survey). Bicycle ridership rates vary depending on the length of the trip being made, for the Tulare County bicycle plan we have assumed a 0.8% bicycle riding rate. Proposed growth in Ridership is based on a 70% increase in ridership with the delivery of all proposed facilities.

Dinuba

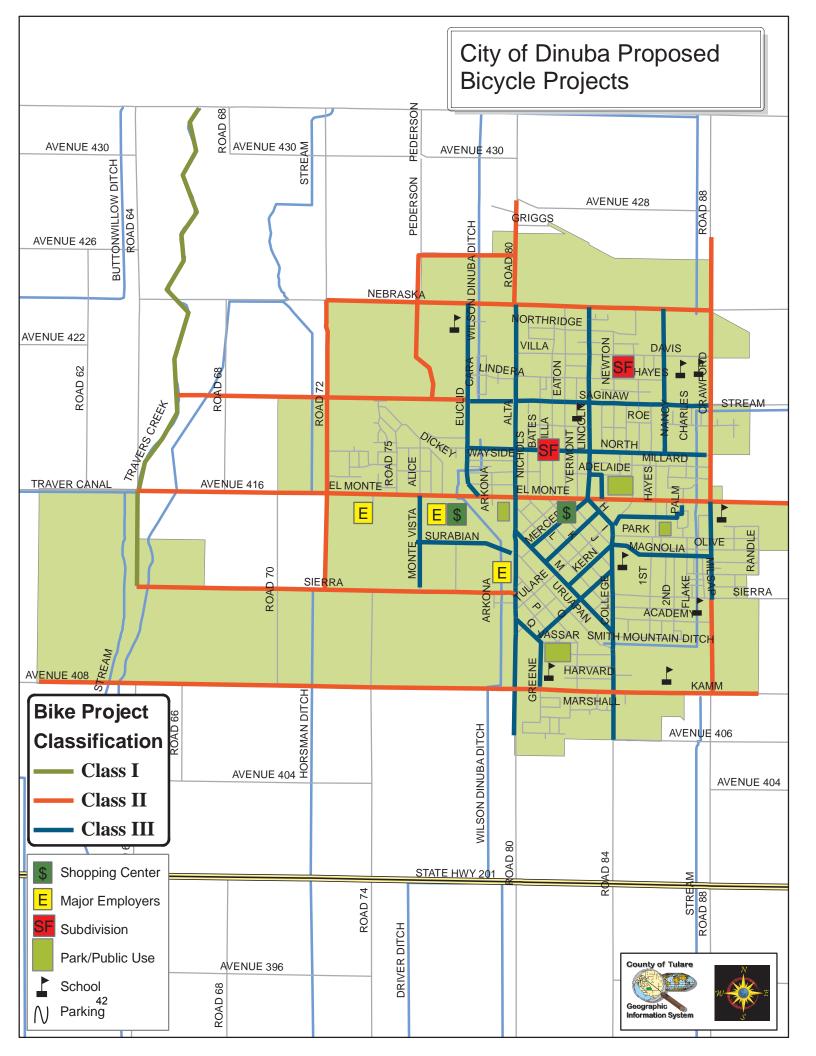

Dinuba is located near the northwest corner Tulare County on the valley floor among diverse agriculture. The small residential community with a growing population of over 21,542 persons covers approximately 7.8 square miles of land. Much of the bicycle activity in town takes place on local roadways with low traffic volumes. The City of Dinuba recently equipped all of it's transit facilities with bicycle racks so residents are now able to connect with other communities and use bicycle as transportation. The City's roadway grid provides alternatives for residents whether they are looking for the fastest route between destinations or are interested in utilizing quiet side streets. Commuters traveling through Dinuba utilize Road 80 or Alta Avenue to travel north south, and J40 or Mountain View Avenue to travel east or west. Dinuba is home to an annual Northern California/Nevada Cycling Association Criterion in the spring, which draws statewide attendees.

Exeter

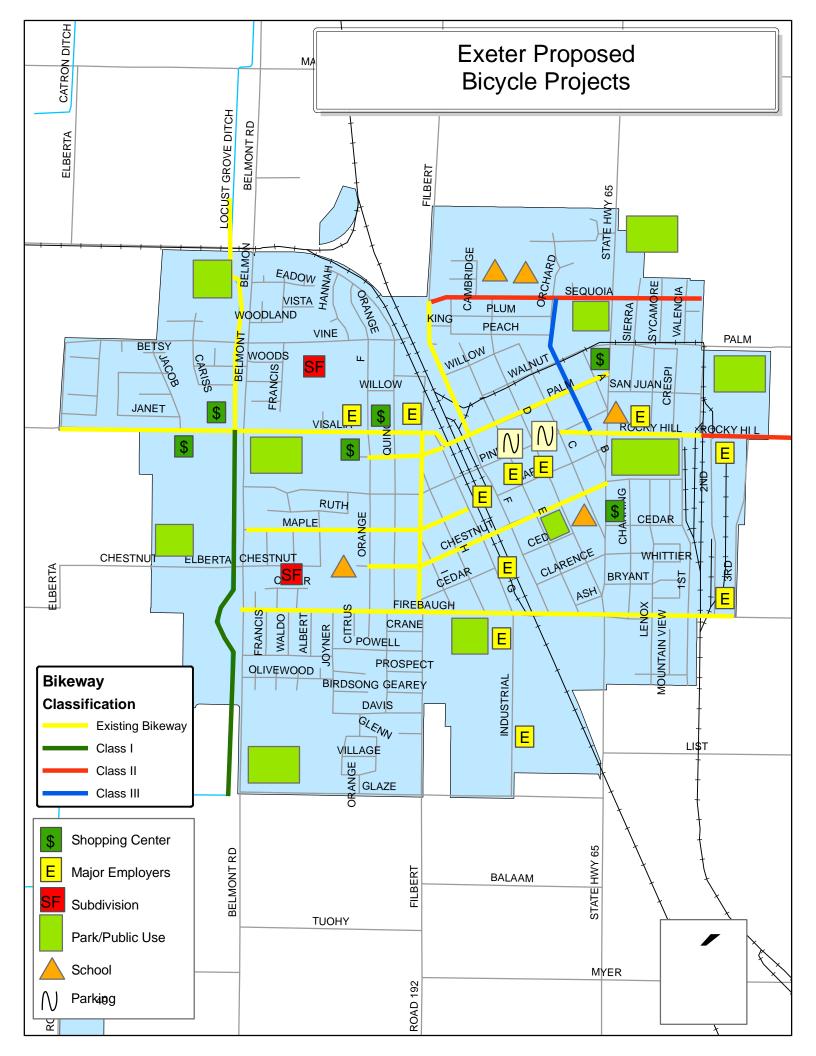

Exeter is a small residential community of approximately 10,752 persons located near the center of Tulare County at the base of the Sierra foothills. Its location puts it close to the County's commercial activity centers and recreation destinations. Known as the gateway to the Sequoias, Exeter covers approximately 3.5 square miles. The Sierra Nevada's snowcapped peaks are visible from Exeter's downtown, which is known to be full of life and art. Murals depicting the town's history and culture adorn many of its historic brick buildings. Exeter is home to nine community parks. Like many central valley farm towns, commerce in Exeter grew with the development of the Railroad. Its streets were laid parallel with the Railroad tracks and from then on Exeter began to grow. Exeter hosts the Sequoia Cycling Classic Road Race, which is held annually in March.

Lindsay

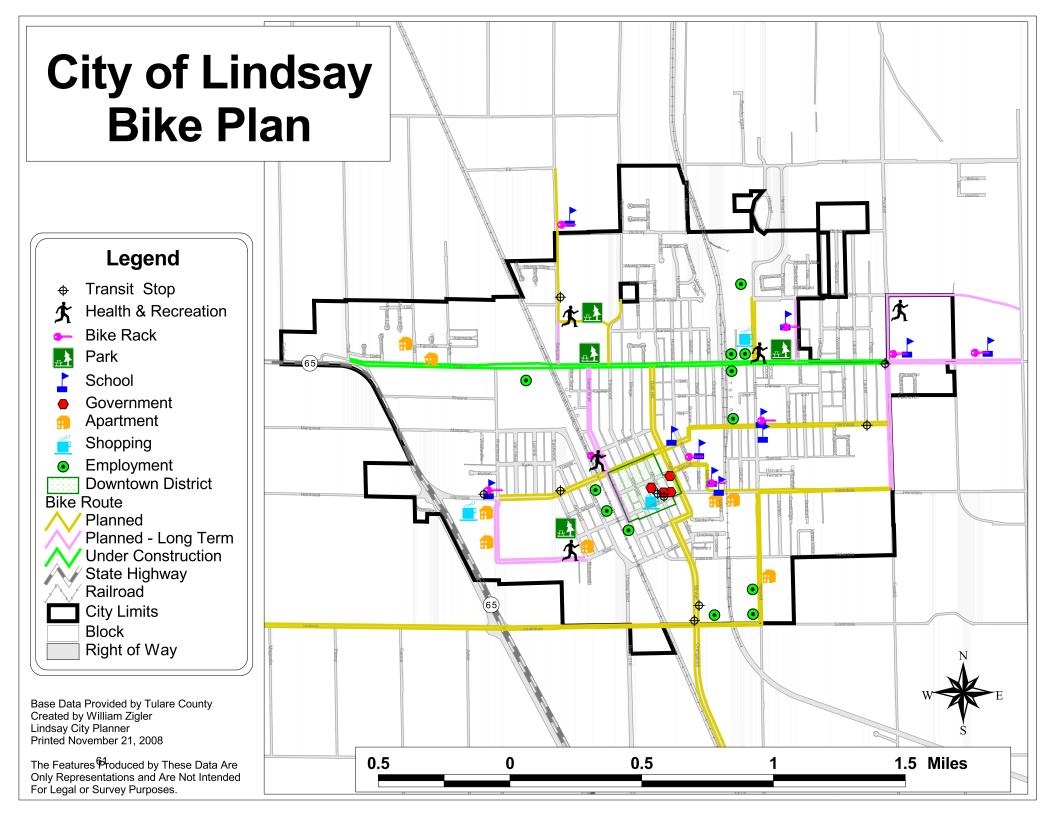

Lindsay is nestled at the base of the Sierra Nevada on highway 65 north of Porterville. The small residential community of approximately 11,800 covers close approximately 2.6 square miles. In June 1995, the community of Lindsay was named the only unanimous choice as al All-America City. Bicycle activity in Lindsay largely consists of local residents riding on residential streets. The small size and layout of Lindsay make bicycle commuting for residents who live and work in town a viable alternative.

^{*}Bicycle rates ranging from 0.4% for commuter trips only (Journey to Work 2000 Census Brief) to 1.6% for all trips made by bicycle in Tulare County (2000-2001 California Statewide Travel Survey). Bicycle ridership rates vary depending on the length of the trip being made, for the Tulare County bicycle plan, in the City of Lindsay, it has been assumed a 1.4% bicycle riding rate. Proposed growth in Ridership is based on a 70% increase in ridership with the delivery of all proposed facilities.

Tulare County Assocation of Governments Bicycle Transportation Plan Proposed Long Term Projects

None.

Porterville

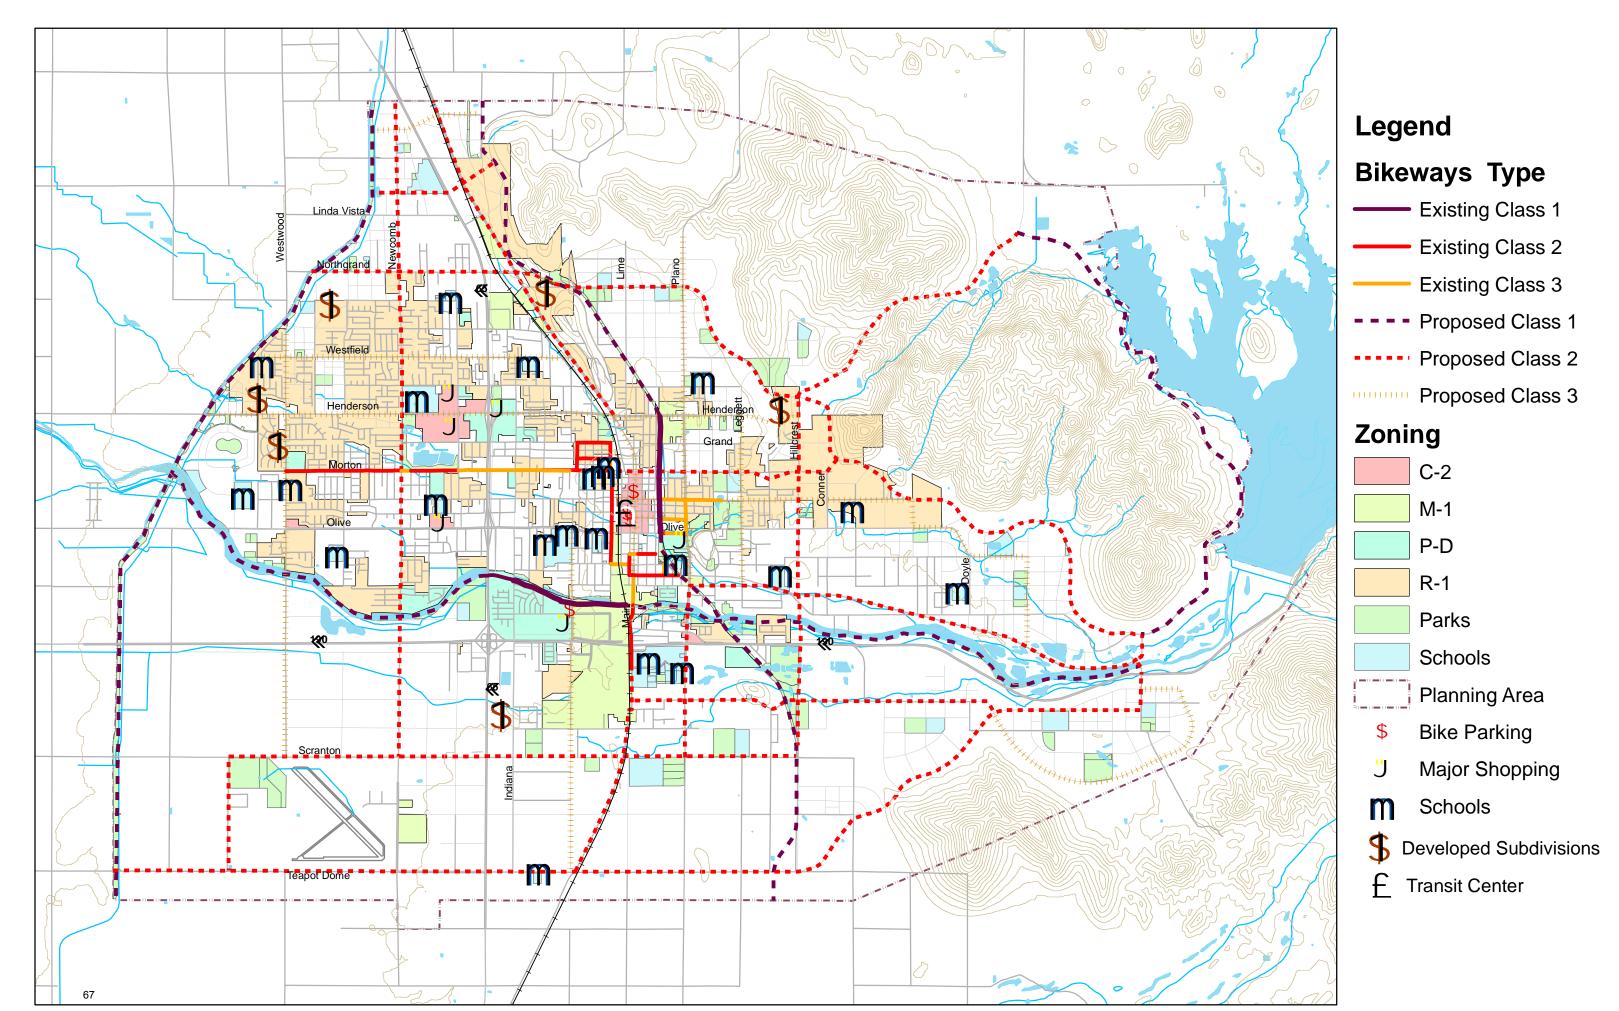

Porterville is located in at the base of the Sierra Nevada along Highway 65 in southern Tulare County. This growing community is home to approximately 52,960 residents, and covers approximately 16.1 square miles. Historically, agriculture has been the City's number one industry. Today, diversified industries including light manufacturing are calling Porterville home, and have become a significant factor in the development of the community. Several of the County's large public facilities are also located in Porterville, including the Sequoia National Forest Headquarters, the Army Corps of Engineers Lake Success Facility, and Porterville Community College.

The City of Porterville has developed the first phase of the Tule River Parkway extends from Westwood Street to Plano Street. The first phase of the project is complete between Indiana Street, Highway 65 and Highway 190. The rest of the project will run from the Tule River Parkway to Mulberry Avenue on the abandon Tulare Valley Railroad right-of-way. An on street connection is planned to link the two pathways using Plano Street.

City of Tulare

The City of Tulare, located near the center of Tulare County along State Route 99 is at the junction of several County bicycle routes. This growing community of approximately 59,535 residents covers approximately 31.1 square miles. Tulare is a city with a strong agricultural background and a diversifying industrial and retail base. Tulare's historic downtown and mix of services and retail shopping attracts visitors traveling to the Sierras. Tulare is home to the World Ag Expo, the largest farm equipment show in the world. Tulare's small town atmosphere and history of bicycle improvements foster a growing cycling community.

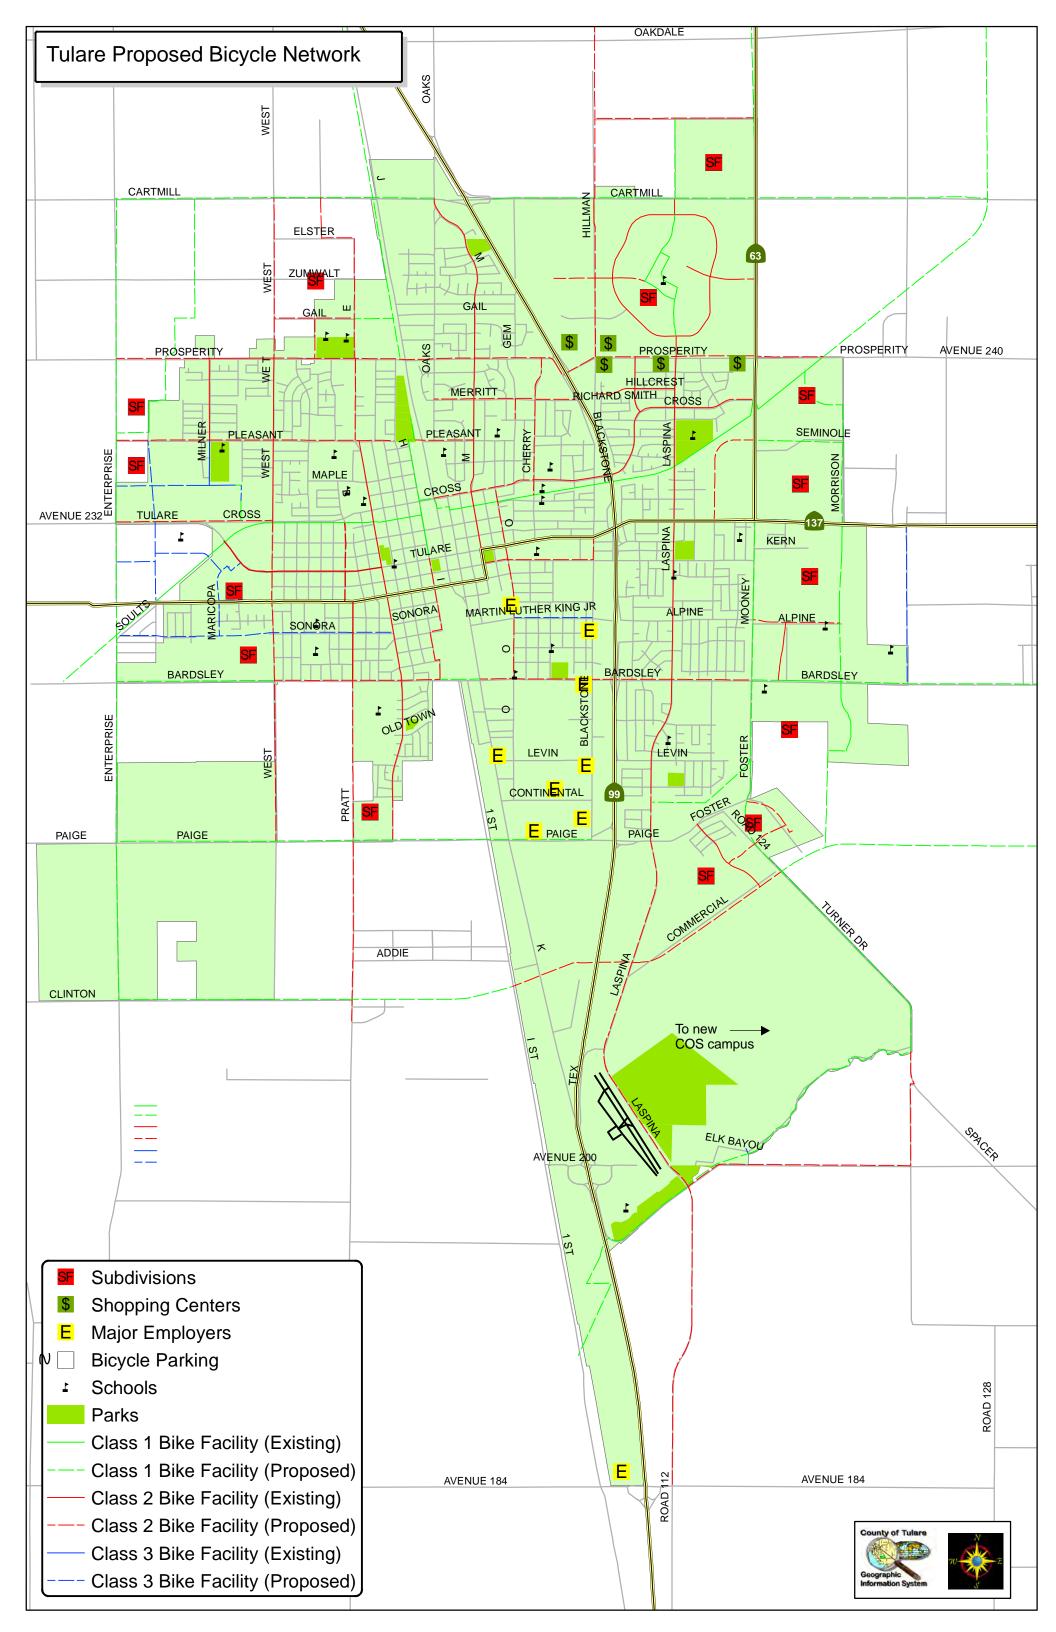

The City of Tulare adopted its first Bike Plan in 1994, and adopted the Regional Bicycle Transportation Plan in 2007. Sixteen years after the first Bike Plan was adopted, the City has become home to over 20 miles of bikeways. This includes the Santa Fe Trail, a Class I bikeway construction as a rails-to-trails project along an abandoned railroad spur supporting operations for the Southern Pacific and BNSF railroads. The 4-mile trail corridor extends from Inyo Avenue (State Route 137) on the west side of town to Prosperity Avenue on the east. The trail will become part of a larger regional bicycle network connecting the City of Tulare with the City of Visalia once the Visalia and County portions of the trail are completed.

In addition to the Santa Fe Trail, Tulare is also applying for grants to implement new Class I trails. These include the proposed Mooney Boulevard corridor, which also includes portions of the Tulare Irrigation District main canal, and along Bardsley Avenue (Ave. 224) between Mooney Boulevard and the new Tulare campus of the College of the Sequoias. Planning has also begun to include a Class I bike trail along Elk Bayou that because of the Bayou's uninterrupted become a valuable countywide recreation and habitat preservation resource.

City of Tulare
2010 Population: 59,535

oto Popula	ition: 59,535		
Section	on Description	Existing	Proposed
a.	Estimated number of commute trips to work by bicycle*	655	1,113
b.	Land Use and Population Density	1	pproximately 3133 persons per square miles
C.	Map and description of bikeways		
d.	End-of-trip bicycle parking facilities		
e.	Bicycle transport and parking facilities for connections with other modes of transportation	Please see Tulare County	bicycle projects map and tables
f.	Map and description of facilities for changing and storing clothes and equipment.		
g.	Bicycle Safety and education programs (Chapter 5)	Safety and education programs are occasionally provided by law enforcement agencies across Tulare County	Improve safety and bicycle education programs across the County. Annual bicycle events to be held at schools and community events regularly.
h.	Citizen and community involvement	Public Outreach efforts included su Bicycle Advisory Committee Meetin Appendix C for more information.	rveys, community feedback, and logs. Please see the Introduction and
i.	Coordination/Consistancy with transportation, air quality, or energy conservation plans.	Please see Chapter 4.	
j.	Description of the projects proposed in the Plan and their priorities	Please see Tulare County bicycle p	rojects map and tables
k.	A description of past expenditures for bicycle projects improving safety and convenience for commuters	Please see Chapters 5, 7 and 9 and and tables.	d Tulare County bicycle projects map

^{*}Bicycle rates ranging from 0.4% for commuter trips only (Journey to Work 2000 Census Brief) to 1.6% for all trips made by bicycle in Tulare County (2000-2001 California Statewide Travel Survey). Bicycle ridership rates vary depending on the length of the trip being made, for the Tulare County bicycle plan, in the City of Tulare, it has been assumed a 1.1% bicycle riding rate. Proposed growth in Ridership is based on a 70% increase in ridership with the delivery of all proposed facilities.

Visalia

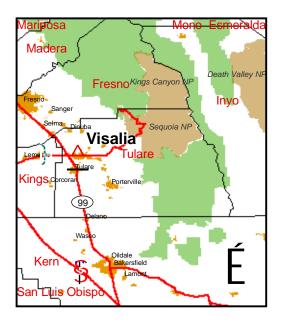

Visalia, the County seat of Tulare County is located just east of State Route 99 on Highway 198, in central Tulare County. This community of approximately 111,168 residents is steadily growing. Visalia covers approximately 35.4 square miles. While still retaining a small central valley town feel, Visalia offers big town amenities, which include a diversified employment base, numerous regional commercial and shopping centers, multi-modal transportation centers, over twenty local parks, a municipal golf course, and a private airport. With a warm dry summer climate, mild winter climate, level terrain, and numerous bicycle facilities, Visalia is an ideal location for bicycling.

Visalia has created and adopted a Bicycle and Waterways trail masterplan, which has been incorporated into this Plan. Over the past number of years, Visalia has developed an extensive bicycle network, and with the availability of Measure R will develop many miles citywide of trails running along abandoned railroad corridors and adjacent to waterways running throughout the City.

City of Visalia 2010 Population: 125,971

UI	U Population:	125,971		
	Section	Description	Existing	Proposed
	a.	Estimated number of commute trips to work by bicycle*	1,512	2,570
	b.	Land Use and Population Density		pproximately 3599 persons per square miles
	C.	Map and description of bikeways		
	d.	End-of-trip bicycle parking facilities		
	e.	Bicycle transport and parking facilities for connections with other modes of transportation	Please see Tulare County	bicycle projects map and tables
	f.	Map and description of facilities for changing and storing clothes and equipment.		
	g.	Bicycle Safety and education programs (Chapter 5)	A bicycle Rodeo safety course is put on by Visalia Police Department, and the Jeff Barnes Brain Injury Foundation.	Improve safety and bicycle education programs across the County. Annual bicycle events to be held at schools and community events regularly.
	h.	Citizen and community involvement	Public Outreach efforts included su Bicycle Advisory Committee Meetin Appendix C for more information.	rveys, community feedback, and gs. Please see the Introduction and
	i.	Coordination/Consistancy with transportation, air quality, or energy conservation plans.	Please see Chapter 4.	
	j.	Description of the projects proposed in the Plan and their priorities	Please see Tulare County bicycle p	rojects map and tables
	k.	A description of past expenditures for bicycle projects improving safety and convenience for commuters	Please see Chapters 5, 7 and 9 and and tables.	d Tulare County bicycle projects map

^{*}Bicycle rates ranging from 0.4% for commuter trips only (Journey to Work 2000 Census Brief) to 1.6% for all trips made by bicycle in Tulare County (2000-2001 California Statewide Travel Survey). Bicycle ridership rates vary depending on the length of the trip being made, for the Tulare County bicycle plan, in the City of Visalia, it has been assumed a 1.2% bicycle riding rate. Proposed growth in Ridership is based on a 70% increase in ridership with the delivery of all proposed facilities.

Woodlake

Woodlake is located on State Route 216 at the base of the Sierras just west of Lake Kaweah. This small community of approximately 6500 residents serves a starting point for many of the Counties most scenic recreational bike rides into the Sierra Nevada. Covering approximately two square miles, the City of Woodlake is expanding its bicycle facilities, with two new Class I multi-use trails and a new Class II route in the works.

The first Class I multi-use trail will extend from Magnolia Street eastward utilizing the abandoned Visalia Electric Railroad right-of-way, ending at St. Johns Street (Road 220), a distance of approximately 5,200'. The planned 8-foot asphalt path will bisect the proposed Bravo Lake Botanical Garden.

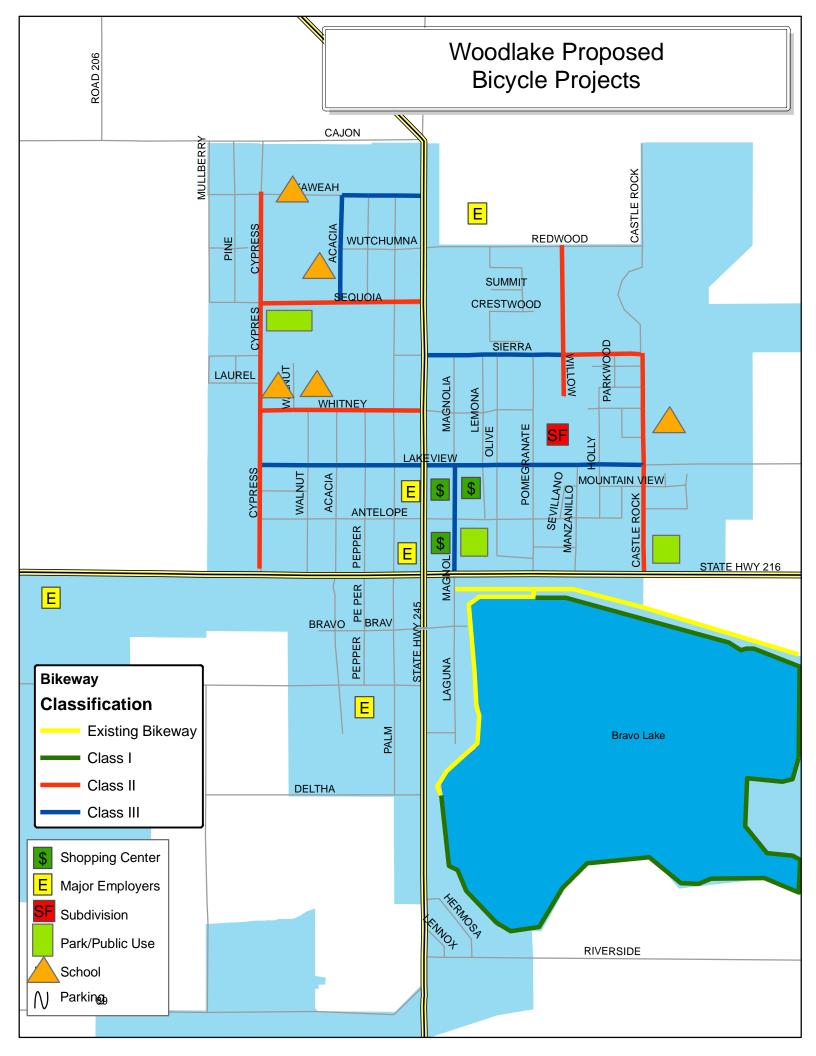

The second Class I multi-use trail, which will be constructed in two stages, will be constructed around Bravo Lake, approximately 3-miles. The planned 10-foot asphalt path will be recreational.

A Class II bike lane will be striped on northbound on Pomegranate Street, east on Lake View Avenue, north on Castle Rock Street, west on Sierra Avenue, and finally extend north on Orangewood, terminating at Watchumna Avenue, a distance of approximately 6,000 feet.

City of Woodlake
